Hi Jimmy,

Thank you for the heads up. I know that you will be missed, but we will look forward to working with Rena going forward.

Good luck with everything moving forward!

Ruby

Hi Ruby,

I'm including Rena Tucker on this email. My last day with DOE will be on the 11th and Rena will be taking over this grant for the time being.

Thanks!

Jimmy

Hi James,

Apologies for the delay since my last email. I am sending along a link to a Doodle poll to find some available times for a discussion on WIIN 2107 sampling and remediation. Whenever you have a moment, please submit your availability. We're hoping to get this scheduled by the end of July, so hopefully it can be helpful as recipients begin to start sampling.

https://doodle.com/poll/nwbtfw46y33uiz5b?utm_source=poll&utm_medium=link

Let me know if there are additional topics of interest for you, or others in Delaware who should attend as well.

Thank you very much and have a great weekend!

Hi Ruby,

Barring any conflicts, I should be able to attend. If this does move forward, feel free to send me the invite.

Thank you,

Jimmy

Hello Casey and James,

I don't know whether we have been formally introduced yet, but I'm Ruby Stanmyer and I work with George Rizzo in the drinking water section at EPA Region 3 on the Lead and Copper Rule and WIIN 2107 grants. We were recently contacted by a representative from a nonprofit in Pennsylvania who has been working with PENNVEST and a firm called Terraphase to assist with outreach to schools and childcare centers for WIIN 2107 sampling in PA. They initiated the idea of EPA hosting a meeting of all WIIN grant recipients in the region to share experiences.

I am reaching out to see if your team in Delaware would be interested in participating in such a meeting, specifically focusing on the issue of finding funding for remediation projects after sampling occurs. This would be an informal discussion for grant recipients, as well as EPA, and could be a great opportunity to share how states are addressing outreach, sampling, and the potential need for lead remediation.

If you think this is something that you and your state colleagues would find helpful, please let me know. I'll report back on general interest levels from you all and will proceed from there.

Thank you very much.
